

μ -metal Chamber (High Permeability Material)

Chamber, made of Mu-metal, provides excellent magnetic shield

Feature

- Magnetic isolated Chamber is suitable for analyzer use
- Thickness available from 1 to 5 mm
- Managed with consistent way of material anneal, welding, hydrogen anneal and magnetic anneal
- Implement various inspection (magnetic field measurement, He leak test)
- Shipment after MS(mass spectrometry) and baking is also available

Product Examples

Sampling Chamber for
Photoemission Spectrometer

ICF203 Mu-metal Chamber

Chamber for
Photoemission Spectrometer

Flux measurement by fluxmeter
